PROFESSIONAL SUMMARY

Computer Science graduate (BS, July 2026) with experience building and delivering software systems for real clients, including inventory, invoicing, and financial reporting platforms. Comfortable working directly with stakeholders to turn requirements into working systems, managing structured data and records, and delivering on deadlines with minimal supervision.

KEY SKILLS

- Requirements gathering and translating business needs into technical specifications
- Software development: JavaScript/TypeScript, React, Node.js, Next.js, SQL and NoSQL databases
- Financial reporting, invoicing, and records/inventory management systems
- Independent project ownership and delivery under deadlines
- Client communication and iterative delivery in agile environments
- Git/GitHub, Postman, Microsoft Office, Google Workspace

EXPERIENCE

Web Developer - Full-time

Jul 2025 - Apr 2026

Synctom, Islamabad, Pakistan

- Worked as part of a small team delivering production software for live, paying clients, taking projects from initial requirements through to deployment and ongoing support.
- Met directly with clients to understand their business processes and translated those conversations into technical specifications, data models, and feature plans.
- Solo-built Newon, a centralized operations platform covering inventory tracking, invoicing, and financial reporting, delivered on schedule for a paying client using Next.js, TypeScript, and MongoDB.
- Built Diniiz, a restaurant management platform with real-time order tracking, live messaging, and an interactive floor-plan tool for table reservations, working alongside another developer.
- Developed Reverie, an internal dashboard used daily by the team for client management, lead tracking, and financial oversight.
- Handled bug fixes, client feedback, and feature updates across multiple live projects at once, working in an agile setup with regular check-ins.

PROJECTS

Newon - Next.js, TypeScript, MongoDB

- Centralized operations platform (inventory, invoicing, financial reporting) built solo for a paying client.

Diniiz - React, Node.js, Express, MongoDB, Socket.io

- Restaurant management platform with real-time order tracking, live chat, and an interactive floor canvas for table reservations.

Cool Care - Svelte, TypeScript, PostgreSQL

- Invoicing and job tracking app built for a real AC and electrical repair business.

Reverie - Next.js, TypeScript, Appwrite

- Internal dashboard for client management, lead tracking, and financial oversight, used daily.

EDUCATION

Bachelor of Science in Computer Science

Sep 2022 - Jul 2026

National University of Modern Languages (NUML), Islamabad, Pakistan

- CGPA: 3.9 / 4.0
- Coursework: Data Structures and Algorithms, Operating Systems, Database Management Systems, Software Engineering
- Scored in the 97.7th percentile on the HEC competency test
- Winner, Visio Spark Quiz - COMSATS Wah Campus (competitive inter-university event)
